S/TO

MEMORANDUM BY THE GERMAN DELEGATION

ON THE EXPORT TO HUNGARY OF A MEASURING OSCILLOSCOPE

The German authorities have received an application to license the export to Hungary of

a measuring - oscilloscope
type OMF-VM-1912 special,
covered by item 1584a),
valued at ℳ2.100,-

Details of the equipment :

bandwidth 20 megacycles
time-base 0.02 us/centimeter

The equipment is of a type specially designed for television-transmitters. The bandwidth of 20 megacycles is necessary to allow an accurate testing over the whole width of the television-band. Even with the bandwidth of 20 megacycles there is a tension loss of 2% when applied on a frequency of 5 megacycles used for television purposes. A bandwidth of only 12 megacycles would produce a greater loss so that testing would not be possible.

The oscilloscope is of the same type as mentioned in Cocom Document 3336 (German request on the export to Poland of two measuring oscilloscopes).

In view of the civilian enduse (television testing) the German authorities would like to grant the licence and trust that no objection will be raised.

The request is submitted within the framework of minimum-shipment procedure.
